Repeat Signage V4

› Truly flexible digital signage software for Windows

Repeat Signage digital signage software helps you get your message across and promote your own products or services.

It is easy to use and you can create a presentation and have it playing in minutes.

You just need a Windows based PC (or Windows media player), a large display screen or touch screen and Repeat Signage.

Why Repeat Signage? The Repeat Software team will give you an outstanding level of support. We give you free [training videos](#), [sample presentations](#), [email support](#) and we have [satisfied customers](#) across the world. [Trial download](#). www.repeatsoftware.com

Repeat Signage ^{V4}

> **WYSIWYG designing (What you see is what you get)**

With Repeat Signage, you design your presentation for the resolution of your screen in landscape or portrait.

Picture courtesy of Sharp Electronics

For example, you may want to display information in

reception area or restaurant on an HD display screen which has 1920x1080 pixels. Repeat Signage allows you to design on this screen in full screen

mode letting you place pictures, text, shapes, text over pictures, icons, real-time clocks and date, videos, PDF files, website pages, Word documents, Excel spreadsheets, PowerPoint files, etc., exactly where you want them, easily moving and resizing. Repeat Signage supports Windows XP, Vista, 7, 8/8.1 and Windows 10.

RepeatServer.com - Free RSS creation and hosting

This free and secure service allows you to create a news feed for your organisation and the news can then be scrolled along the bottom of your digital signage screens. Your news can be updated remotely from anywhere in the world. Change the news online and it changes on your screen in seconds. RepeatServer.com also facilitates the remote updating of Repeat Signage including text and pictures displayed on your screens, free-of-charge. Plus, over 3,000 images for you to use in your Repeat Signage presentations.

>Repeat Signage Software Products:

[Repeat Signage V4 digital signage software](#)

Standalone Edition - Basic features. For single screen display in reception areas, on exhibition stands and in individual shops. Changing content is done manually. Touch screen support. [Trial download.](#)

Standard Edition - Remote updatable system. 90% of customers choose the Standard Edition. For single screen display, allows scheduling and playlists. Includes spreadsheet control and touch screen support. Update your content from a shared network drive, a website, FTP or over the Internet, free-of-charge at [RepeatServer.com](#) [Trial download.](#)

Corporate Edition - Remote updatable system. Same as the Standard Edition plus database support in most controls and additional data controls. The Picture, Text, RTF, FlashBanner, and WebBrowser controls all support displaying database information. [Trial download.](#)

Media Wall Edition - 4 monitor support for creating media and video walls. Same as Corporate Edition with the additional ability to display same or different content on up to a 4-screen video wall. [Trial download.](#)

Repeat Signage customised editions - We work closely with resellers to customise Repeat Signage for niche markets. For example, we work with UK estate agent IT reseller Logic 1st Ltd to customise Repeat Signage to play RightMove property feed files. RightMove is the main property sales website in the UK and estate agency management software exports in the RightMove BLM format.

This version has all the features of the Standard Edition with an extra RightMove feed player control. [View Hunters success story.](#)

“At Caxton House, the corporate Head Office of our company and home of Caxton Magazines, we replaced our messy stick-on notice boards with electronic notice boards, using Repeat Signage Standard Edition digital signage software. We make use of RSS feeds a lot, also using the RSS feed facility provided by Repeat Signage for quick editing and displaying our company, staff and building related information and announcements - even birthdays and canteen specials!” Riaan Harttingh.

Benefits of Repeat Signage V4 software

The Repeat Software team, UK developers of Repeat Signage digital signage software, believe that customers should be able to update their presentations remotely over the Internet without having to pay subscriptions.

Repeat Signage V4 software licence is a one-off fee, unless you decide to upgrade. You have a choice of how to update the content in your presentations, either from a shared network drive, from a website, via .FTP or remotely over the Internet from anywhere in the world (with an Internet connection), using our free online portal RepeatServer.com

We believe in giving extra value to our customers and you can use any of the 3,000 images or 4,000 icons in your Repeat Signage presentations. You can even generate an income by editing one of our advert templates to showcase services, for example, a College advertising the services of a music or dance instructor; a hotel advertising spa products or wedding fayres, etc. Repeat Signage supports Unicode for displaying German, Greek, Chinese, Japanese and other country characters.

Plus we give you free training videos, sample presentations and email support. And you can try Repeat Signage for yourself with a [trial download](#).
